## Skills

---

- C | C++ | Java | Python | x86/ARM assembly | JSON | MSSQL | OpenCL | CUDA | Robotics | NoSQL | Git | Agile | Open-Source Contributor
- System Admin | CI/CD | JUnit | Linux | Device Drivers | Unit Testing | OOP | Agile | Software Development
- Troubleshooting | Distributed Systems | Firmware | Networking | Communication Protocols (I2C, SPI, UART) | Docker | Collaborative

## Experience

---

### Software Engineer

### UC Berkeley

Berkeley, CA, USA

10/2023 - 04/2024

- Discussed in designing and developing UI applications for the end-user, increasing usability by 10 – 15% using the latest technologies of C++, Qt, and QtCreator.
- Implement scalable plugins back-end using Java and Javax and managed the UI design for those plugins.
- Developing LLSM GUI applications for multiple platforms, Mac and Linux.
- Hosted meetings and discussions on identifying application requirements, and software dependencies to workload balancing, software implementation, test, and configuring different metrics systems.
- Continuous Integration/Deployment pipeline integration, pull requests, code reviews, load/stress testing, unit/integration/e2e testing.

## Education

---

### Bachelor of Science

### San Francisco State University

San Francisco, CA

01/2024 – 05/2026

- Major in Computer Science

## Projects

---

- **ENGINE3D**: Creator of a 3D Game Engine (C++, Open). Link to [Github](#) showcasing the display of engine's capabilities **(01/2023)**
- **Libhal-Soft**: Porting over different drivers such as lpc40, CAN, ADC, DAC for adding support to different arm chips. **(12/2023)**
- **NovaOS**: Creator, designer, and developer of an Operating System called **NovaOS** developed using x86 and C **(12/2023)**
- **Holographic Projection**: Lead, designer, and developer of a class group project developing a holographic projector using multiple sensors to give it capabilities to interacting with users **(03/2022)**
- **Log Script**: Assisted in collaboratively working with my professor, developing a bash script. Using the script for as an student anti-cheat detector that checks for anomalies when students submit their hands-on programming homework using Linux utility commands.

## Clubs

---

- **SJSU Robotics**: Collaborated with a team and collaborated multiple sensors firmware for reliable data acquisition. Combining multiple data sources to enhance perception to enabling robust navigation by 20% in challenging environments.
- **Chinese Club**: President of the Chinese Club for 2 years. Showcasing leadership and planning of club events. Planned workshops in learning more about Chinese culture and the history.
